WINDOWS & DOORS

IN PARTNERSHIP WITH

FROM THE ANVIL

DOOR & WINDOW FURNITURE

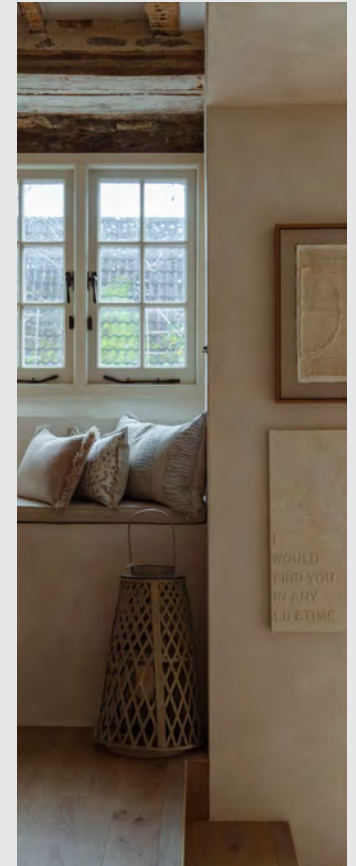

THE COLLECTION

Ironmongery is an everyday essential. While it may seem like a small or final detail, the right choice of door and window furniture can totally transform the look, feel, and functionality of any property! This hardware offering has been hand-forged from solid brass, solid bronze, mild steel and marine-grade stainless steel to provide longevity and uniqueness in each piece.

THE FINISHES

Forged from steel, brass and bronze, our exclusive product collection offers bespoke styling with modern functionality, available in a wide range of beautiful finishes which have been meticulously refined and perfected over the years to provide unrivalled strength and durability, and will last a lifetime when properly cared for.

BEESWAX

FOR INTERNAL USE ONLY

Beeswax is our most traditional finish with a soft, natural aesthetic featuring subtle blue and deep red ochre tones which are preserved in the steel during the manufacturing process; this finish is ideally suited to older, traditional dwellings and cottage interiors.

Beeswax products are hand forged from mild steel. After forging, the subtle colours in the metal are preserved by dipping the products in hot beeswax, resulting in the soft, matte richness and offers excellent protection when the products are fitted internally.

EXTERNAL BEESWAX

FOR INTERNAL & EXTERNAL USE

Our External Beeswax finish aesthetically is the same as Beeswax; A traditional finish with a soft, natural look featuring subtle blue and deep red ochre tones which are preserved in the steel during the manufacturing process. This finish is ideally suited to older, traditional dwellings and cottage interiors.

Our External Beeswax products are hand forged from mild steel. After forging, the subtle colours in the metal are preserved by dipping the products in hot, anti-corrosive beeswax unique to From The Anvil. This results in a soft, matte richness and offers excellent protection when the products are fitted both internally and externally.

BLACK

FOR INTERNAL & EXTERNAL USE

Our classic Black finish is the perfect choice for those looking to make a bold statement. This finish is best suited to traditional properties and interiors, and looks fantastic when paired with neutral colourways and natural materials such as timber, stone and tile.

Our Black products have a distinctive, subtle sheen; hand forged from mild steel this finish are extremely low maintenance, offering excellent corrosion resistance and durability as a result of being powder coated, then baked in a high temperature oven during the final stages of manufacturing. An extremely low maintenance finish, ideal for use in kitchens and bathrooms, or externally where damp conditions are expected.

MATT BLACK

FOR INTERNAL & EXTERNAL USE

Matt Black is an extremely versatile, timeless finish; Naturally, it looks great when used in ultra-modern settings, but can also be used to add a touch of sophistication and refinement to more traditional homes and interiors.

Our Matt Black finish is applied to a base of solid steel, before being baked in a high temperature oven, resulting in the unique, subtle black patina which emphasises the products clean silhouette. An extremely low maintenance finish, ideal for use in kitchens and bathrooms, or externally where damp conditions are expected.

POLISHED MARINE SS (316)

FOR INTERNAL & EXTERNAL USE

Our Polished Marine 316 Stainless Steel is a bright, high sheen, finish well suited to a range of architectural styles. A versatile choice that looks especially striking when used against dark and dramatic hues, but also works when paired with a range of more subtle colours for a classic look.

Manufactured with high concentrations of chromium and nickel, our Satin Marine Stainless Steel is grade 316 and offers extremely resilient, corrosion resistant properties, exceeding 1,000+ hours salt testing. This finish is an excellent choice for coastal locations and highly polluted environments.

SATIN MARINE SS (316)

FOR INTERNAL & EXTERNAL USE

Our Satin Marine 316 Stainless Steel products are ideal for those looking for a hardwearing, low sheen finish. It's cool tones and lightly brushed surface make it distinctly contemporary, and work best when paired with lighter tones and subtle textures complementing clean, modern aesthetics.

Manufactured with high concentrations of chromium and nickel, our Satin Marine Stainless Steel is grade 316 and offers extremely resilient, corrosion resistant properties, exceeding 1,000+ hours salt testing. This finish is an excellent choice for coastal locations and highly polluted environments.

ANTIQUE PEWTER

FOR INTERNAL & EXTERNAL USE

Antique Pewter is a classic finish with industrial undertones and warmth; a slightly darker alternative to our Pewter Patina finish, but similarly versatile and well suited to a range of architectural styles and interiors thanks to its natural, understated notes.

Our Antique Pewter finish is a soft, aged finish created through a multi step process on a solid brass base. First the products are plated, then a patina is applied before they are hand-rubbed, highlighting details in the metal and giving the products a vintage, timeworn look.

PEWTER PATINA

FOR INTERNAL & EXTERNAL USE

This charming finish is well suited to characterful homes and interiors, where a more refined, yet traditional look is desired. Pewter Patina products work beautifully when used with natural timbers and oak, but can also be modernised by pairing them with painted finishes in a variety of colours.

Hand Forged from a durable base of steel, our Pewter Patina finish is an excellent example of how our unique manufacturing techniques add further detail to the natural charm of the base material.

Pewter Patina products undergo an accelerated ageing process, creating a dark patina before being placed into barrelling machines, giving them the unique finish. During the final stages of manufacturing, a high quality, clear matt lacquer is applied for protection. A low maintenance finish, ideal for use in kitchens and bathrooms, or externally where damp conditions are expected.

AGED BRASS

FOR INTERNAL & EXTERNAL USE

A popular choice for Period homes and interiors; Our Aged Brass finish offers a characterful warmth and works beautifully, creating a real statement when used with deep, dark paint colours, and materials & textiles synonymous with luxury and abundance.

Manufactured from solid, unlacquered Brass, our Aged Brass products undergo an accelerated ageing process before surface areas are repolished, creating a striking contrast between the darker patina left around the edges and recesses, and brighter surface areas. As an unlacquered, 'living' finish Aged Brass will continue to oxidise, meaning it will darken over time. If the product becomes too dark or tarnished, it can be polished to restore the brighter finish on surface areas.

POLISHED BRASS

FOR INTERNAL & EXTERNAL USE

Polished Brass is a simplistic, classic finish most synonymous with use in traditional period properties and interiors, yet works well paired with light colours and subtle textural details to achieve a luxurious, more modern aesthetic.

Our Polished Brass products are manufactured from solid, unlacquered brass. Bright and reflective when polished, although as an unlacquered, 'living' finish it will continue to oxidise, meaning it will darken over time. If the product becomes too dark or tarnished, it can be polished to restore the brighter finish.

SATIN BRASS

FOR INTERNAL & EXTERNAL USE

Satin Brass offers a sophisticated and more contemporary alternative to Polished and Aged Brass. The rich, warm undertones, and matt look of this finish exude luxury and are perfect for creating a statement in any space. Best suited to more modern homes and interiors, it works well when paired with darker tones and colours.

Manufactured from solid brass, our Satin Brass products are brushed with a satin wheel during the final stages of manufacturing, giving them their distinctive, matt appearance, before a high quality matt lacquer is applied to the surface for protection.

BURNISHED BRASS

FOR INTERNAL & EXTERNAL USE

Burnished Brass is an excellent choice for those wanting to add subtle luxury to their home interiors. Offering warmth without over dominating, this timeless finish complements a range of colours, and looks especially stunning when paired with paler shades.

Hand forged from a base of solid brass, Burnished Brass is an excellent example of how our unique manufacturing techniques add further intrigue to the natural charm of the base material. Each product undergoes an accelerated ageing process, creating a dark patina before being placed into barrelling machines, giving them the beautiful burnished finish. During the final stages of manufacturing, a high quality, clear matt lacquer is applied for protection.

AGED BRONZE

FOR INTERNAL & EXTERNAL USE

Aged Bronze is a versatile finish that's equally suited to interiors featuring lighter shades for bold contrast, or darker hues for a more subtle aesthetic. One of our most popular finishes favoured for it's dark, matte richness with distinctive warm undertones unlike any other finish in our range.

Our Aged Bronze products are made using solid bronze containing a minimum of 85% copper. The process used to age the metal is what gives it a dark, dramatic appearance, before a durable matt lacquer is applied during the final stages of manufacturing to help protect and preserve it's distinctive tones.

POLISHED BRONZE

FOR INTERNAL & EXTERNAL USE

Polished Bronze is a bright, highly reflective finish with an abundance of character and warmth. This finish really pops when used in contemporary settings with bold colourways, adding visual interest and contrast.

Our Polished Bronze is manufactured from solid bronze containing a minimum of 85% copper. The finish is first aged, then repolished to create subtle contrast between the lighter surface areas and darker patina which gathers around the edges and recesses. To preserve the bright, reflective finish a durable lacquer is applied during the final stages of manufacturing. Bronze will naturally darken over time, however the bright reflective finish can be restored by polishing with a beeswax based furniture polish if desired.

POLISHED CHROME

FOR INTERNAL & EXTERNAL USE

Polished Chrome is a high sheen finish that is best suited to modern interiors. It's bright, reflective qualities work well where a clean, minimalistic look is desired; the cool tones complementing bold colours and contemporary styling.

Polished Chrome products are made from a base of solid brass, with a durable chrome plating applied to the surface resulting in an exceedingly high-sheen finish.

SATIN CHROME

FOR INTERNAL & EXTERNAL USE

Satin Chrome is a beautifully understated, more subtle alternative to some of our polished finishes; it's cool, blue traces and less reflective appearance make it a favourable choice for modern homes and interiors, yet it also works well in period properties where a contemporary touch is desired.

Manufactured from a base of solid brass with a high quality chrome plating applied to it's surface, our Satin Chrome products are brushed with a satin wheel during the final stages of manufacturing, giving them their distinctive, matt appearance, before a high quality matt lacquer is applied to the surface for protection.

POLISHED NICKEL

FOR INTERNAL & EXTERNAL USE

Polished Nickel is an excellent choice for those looking for a bright, reflective finish with warmth. This extremely versatile finish is best suited to contemporary interiors, but can also work well in more traditional settings due to it's warm calming undertones.

Our Polished Nickel is a high quality chrome plating applied to solid brass. The subtle brassy undertones of this finish are a result of only one plating being applied, which offer a warmth that cannot be replicated with more modern, cooler chrome finishes.

CARE & MAINTENANCE

To increase the mechanical life expectancy of your products, we recommend regular oiling of all moving parts using our '3-in-1 Oil' (92337). This process is also highly recommended during initial installation.

An oily cloth can be used to wipe over the product from time to time to remove any harmful deposits that build up on the surface of your product, this will also aid protection against any environmental elements.

We recommend avoiding the use of any chemicals or cleaning products on our products (unless specifically stated in our full care guides) to prevent a break-down of the finish.

For full maintenance, care, warnings and fitting guides, please see our website at:

www.fromtheanvil.co.uk

GENERAL WARNINGS

Environmental Conditions

Whilst all finishes will age gradually certain environmental factors will increase the rate at which this occurs. We always encourage following our maintenance guidelines to ensure your products stay looking their best.

However, in coastal or harsher environmental property locations we would recommend the following finishes:

Satin Marine SS (316), Polished Marine SS (316), Aged Brass & Polished Brass.

Acetylated Wood

Acetylated wood is the technical term for timber which has undergone chemical modification to produce a more dimensionally stable, longer lasting base material, Accoya is the most well know of these woods. All our ironmongery is supplied with stainless steel hardware as standard to ensure suitability for use with acetylated wood. All finishes which are listed as suitable for external use can be fitted providing the door or window has been fully painted. If unfinished wood is being used, then stainless steel or brass should be selected.

Wet Trades

This includes plasters, painter and decorators as well as any other trades which may affect the atmospheric conditions in the room. When dealing with these trades we recommend ensuring the room is fully cured & dry before fitting our ironmongery to ensure there are no harmful substances in the environment to impact on the longevity of the hardware.

MULTIPOINT LEVER HANDLES

These stylish espagnolette door handles are crafted from the finest quality materials and have been designed with longevity in mind.

The ergonomic shapes ensure ease of use, and the varying designs will complement traditional or contemporary entrance doors beautifully.
